

**SOLAR ENERGY PROGRAM
SOLAR ELECTRIC
Residential Application and Agreement**

Incentive Reservation Requirements:

The following information must be provided to SRP in order to reserve an incentive:

1. A completed application, including all necessary signatures.
2. A three-line electrical diagram as described in Section VI of this application.
3. A site plan as described in Section VI of this application.
4. A quote on company letterhead that includes the customer's name and address, system description, estimated installation date, and cost.
5. A copy of the signed lease agreement (if applicable).

The application package can be submitted to SRP by e-mail at EarthWiseSolar@srpnet.com, by fax at (602) 629-7985, by hand delivery to 2727 E. Washington St. in Phoenix, Arizona, or by mail at the following address:

SRP EarthWise™ Solar Energy
Residential Solar Electric Program
Mail Stop PAB 355
P.O. Box 52025
Phoenix, AZ 85072-2025

Incentive Payment Requirements:

SRP will pay the incentive after the system has been commissioned and all paperwork has been verified. Please note that signed copies of the following additional documents must be provided to SRP after the application has been approved, but before the incentive will be paid:

1. Two original, signed copies of the Distribution Interconnection Agreement (provided by SRP during the application review process)
2. One signed copy of the Exhibit A - Bill of Sale (provided by SRP during the application review process)
3. One signed copy of the Residential Solar Electric Installation Certification (available at www.srpnet.com/solar)

If you have any questions regarding this application, please contact the SRP EarthWise™ Solar Program at (602) 236-4661, or by e-mail at EarthWiseSolar@srpnet.com.

SECTION I: CUSTOMER INFORMATION

Name on SRP Account _____ Daytime Phone # _____

Spouse Name _____ Evening Phone # _____

System Location Address _____

City _____ State _____ Zip Code _____

Mailing Address (if different from system location) _____

City _____ State _____ Zip Code _____

Meter # (where the system will tie in) _____ Gate Code (if applicable) _____

Customer E-mail _____

Form Completed By _____ Phone _____

Customer Name _____

SECTION II: EQUIPMENT DEALER (Same as Installer)

Company Name _____ Phone _____

Mailing Address _____

City _____ State _____ Zip Code _____

Contact _____ Phone _____

E-mail _____ Fax _____

License(s) Number: B- _____ C-05 (Solar)* _____ C-11 _____

KB-1 _____ KB-2 _____ KO-* _____

K-05 (Solar)* _____ K-11 _____

** Please attach the scope of work that was provided with the application for this license number as provided by the Registrar of Contractors unless one is already on file with SRP.*

SECTION III: INSTALLER INFORMATION

Company Name _____ Phone _____

Mailing Address _____

City _____ State _____ Zip Code _____

Application Contact _____ Phone _____

E-mail _____ Fax _____

Design Contact _____ Phone _____

E-mail _____ Fax _____

License(s) Number: C-05 (Solar)* _____ C-11 _____

K-05 (Solar)* _____ K-11 _____

** Please attach the scope of work that was provided with the application for this license number as provided by the Registrar of Contractors unless one is already on file with SRP.*

SECTION IV: SOLAR ELECTRIC SYSTEM INFORMATION

System Information:

Purchase Lease (must provide copy of lease agreement for SRP approval)

On-grid Off-grid Expansion to existing system (only list new equipment)

Existing Building New Building

New Service Entrance/Entrance Upgrade? Yes No

Customer Name _____

Manufacturer Information:

Module _____ Model # _____ Qty. _____
 Module _____ Model # _____ Qty. _____
 Inverter _____ Model # _____ Qty. _____
 Inverter _____ Model # _____ Qty. _____
 Battery _____ Model # _____ Qty. _____

Array Rating (Watt-DC-STC)*: _____

**Please provide the total array size, even if it exceeds the Incentive cap for the program.*

Estimated System Generation (kWh/year):

$$\frac{1,600 \text{ kWh per kW-DC/year}}{\text{(Average System Output)}} \times \frac{\text{_____}}{\text{(kW-DC-STC)}} = \frac{\text{_____}}{\text{(Estimated System Generation)}}$$

Inverter Information: kW-AC: _____ **Voltage:** 208 240 **Phase:** Single Phase Three Phase

Estimated Installation Date: _____

For Purchased Systems:

Requested Incentive: $\frac{\$2.15/\text{Watt-DC-STC}}{\text{(SRP Incentive)}} \times \frac{\text{_____}}{\text{(Watt-DC-STC)}} = \$ \frac{\text{_____}}{\text{(Total Incentive**)}}$

***SRP EarthWise™ Solar Energy Program Incentive is currently capped at \$10,750.*

For Leased Systems:

Available Incentive: $\frac{\$2.15/\text{Watt-DC-STC}}{\text{(SRP Incentive)}} \times \frac{\text{_____}}{\text{(Watt-DC-STC)}} = \$ \frac{\text{_____}}{\text{(Available Incentive**)}}$

***SRP EarthWise™ Solar Energy Program Incentive is currently capped at \$10,750.*

Lease Prorating: $\frac{\text{_____}}{\text{(Lease Term in Years)}} / \frac{20}{\text{(REC Purchase Period)}} = \frac{\text{_____}}{\text{(Lease Prorating)}}$

Requested Incentive: $\frac{\text{_____}}{\text{(Available Incentive)}} \times \frac{\text{_____}}{\text{(Lease Prorating)}} = \$ \frac{\text{_____}}{\text{(Total Incentive)}}$

Verification of SRP Incentive:

TO BE COMPLETED BY SRP:		
$\frac{\$2.15/\text{Watt-DC-STC}}{\text{(SRP Incentive)}} \times \frac{\text{_____}}{\text{(Watt-DC-STC)}} = \$ \frac{\text{_____}}{\text{(Total Incentive*)}}$		<div style="border: 1px solid black; width: 100%; height: 20px; background-color: #e0e0e0;"></div> (Completed By)
<i>* SRP EarthWise™ Solar Electric Program Incentive is currently capped at \$10,750.</i>		
For Leased Systems:		
$\frac{\text{_____}}{\text{(Lease Term)}} / \frac{20}{\text{(REC Period)}} = \frac{\text{_____}}{\text{(Lease Prorating)}}$		$\frac{\text{_____}}{\text{(Available Incentive)}} \times \frac{\text{_____}}{\text{(Lease Prorating)}} = \$ \frac{\text{_____}}{\text{(Total Incentive)}}$
System Output:		
$\frac{1,600 \text{ kWh per kW-DC/year}}{\text{(Average System Output)}} \times \frac{\text{_____}}{\text{(kW-DC-STC)}} = \frac{\text{_____}}{\text{(Estimated System Generation)}}$		

Customer Name _____

SECTION V: EXCESS POWER SALES

SRP allows customer-located, interconnected solar electric systems to sell excess energy to SRP. For details and rules, please refer to SRP's applicable service riders located at www.srpnet.com/prices (click on the *complete price plan details* PDF). Please indicate below if you wish to sign up to sell excess power to SRP.

Excess Power Sales: Yes No

Indicate Type of Excess Power Sale: Solar Net Metering Rider Buyback Service Rider

SECTION VI: ELECTRICAL DRAWING INFORMATION

The information below must be submitted for all projects. Diagrams must also include project name and address, show system size and all protective relaying and control equipment, as well as service entrance and SRP meter. **For system expansions, the drawings must show the existing system, as well as the expansion.**

A. Electrical Three-line diagram:

Include all neutral and ground conductors and connections.

B. Site Plan:

Include the street address, arrangement of the major equipment, including the electrical service entrance section and SRP meter, location of generator and interface equipment, and the location of the disconnect switch.

SECTION VII: SRP EARTHWISE SOLAR ENERGY PROGRAM TERMS AND CONDITIONS

This SRP EarthWise™ Solar Energy Solar Electric Agreement ("Agreement") is entered into by and between Customer ("Customer") and Salt River Project Agricultural Improvement and Power District, an agricultural improvement district organized and existing pursuant to the laws of the State of Arizona ("SRP"), sometimes referred to individually as a "Party" and collectively as the "Parties". The definitions and information included in the SRP EarthWise™ Solar Energy Solar Electric Application, as well as exhibits and addenda, are also incorporated into this Agreement. The Parties agree as follows:

GENERAL REQUIREMENTS

1. Customer is an active residential SRP account holder and will install the solar electric system ("Generating Facility") in SRP service territory. For new construction, the homebuilder is the Customer until sale of the property.
2. Generating Facilities installed before January 1, 2004 are not eligible.
3. Only SRP customers are eligible. Off-grid Generating Facilities are eligible for properties located inside SRP service territory, but which are outside the range of SRP's electrical distribution system.
4. Customer may elect to have a separate entity ("Third Party") design, install, own or operate the Generating Facility and satisfy some or all of the terms of this Agreement via separate contractual agreement with the Third Party.
5. Customer may apply for the Incentive on a leased or owned system, provided SRP receives a copy of and approves the lease.
6. Customer shall sign SRP's current form of the Distribution Interconnection Agreement ("Interconnection Agreement") and meet all SRP interconnection requirements (as set forth in SRP's Rules and Regulations, Electrical Service Specifications and Interconnection Guidelines for Distributed Generators) before interconnecting the Generating Facility.

INSTALLATION AND EQUIPMENT REQUIREMENTS

7. Customer must use a licensed dealer and installer to qualify for this program. Eligible license classifications for dealers include: B-, C-05 (Solar), C-11, KB-1, KB-2, KO- (Solar), K-05 (Solar), and K-11. Eligible license classifications for installers include: C-05 (Solar), C-11, K-05 (Solar), and K-11. If you are leasing your system, the entity through which you are leasing the system must be classified as the dealer in this application and comply with the associated licensing requirements. To verify a contractor's license validity, please visit the Arizona Registrar of Contractors at www.azroc.gov. If the vendor subcontracts installation to another company, both the vendor and installer must be licensed. SRP shall not be responsible for any damages or other problems resulting from the Generating Facility or installation of the Generating Facility.

8. Generating Facilities must be permitted and inspected as required by the Authority Having Jurisdiction ("AHJ") (e.g., a city or county). If the AHJ has elected to not require a permit or inspection for installation or modification to the Generating Facility then the Customer and installer must sign a Certificate in Lieu of Clearance, which SRP will provide.
9. Customer shall be responsible for the design, installation, construction, operation and maintenance of the Generating Facility in accordance with all manufacturers' requirements, all applicable codes and laws, and the requirements of all governmental agencies having jurisdiction. SRP does not warrant or guarantee the amount of energy, energy savings, or product reliability.

INCENTIVE

10. The EarthWise™ Solar Energy Incentive ("Incentive") will only be provided for one Generating Facility per SRP account, up to the Incentive cap.
11. SRP will pay \$2.15/watt (based on the watt-DC-STC rating) up to a cap of \$10,750 (5 kW-DC) per Generating Facility. For leased Generating Facilities, SRP will prorate the Incentive based on the length of the base term of the Lease as it compares to the standard Environmental Attributes and Environmental Attribute Reporting Rights term for purchased Generating Facilities of 20 years. The Incentive will be paid after the Customer obtains clearance from the AHJ or submits a Certificate in Lieu of Clearance, the Generating Facility passes SRP inspection, and the Customer signs SRP's current form of Interconnection Agreement.
12. An annual capacity cap is set for the EarthWise™ Solar Energy Program. After the capacity cap is reached, SRP will take reservations for the following year.
13. SRP reserves the right to adjust the Incentive level and capacity cap at any time based on participation.
14. SRP is not responsible for any tax liability imposed on Customer as a result of the Incentives under this program.
15. For purchased Generating Facilities. In exchange for the EarthWise™ Solar Energy Incentive SRP has reserved for and will pay to Customer, Customer shall sell, transfer and deliver to SRP (using the form of Bill of Sale as Exhibit A) all Environmental Attributes and Environmental Attribute Reporting Rights associated with the generation of energy by the Generating Facility for a period commencing on the date that the Generating Facility is placed in service and ending on the 20th anniversary of the in service date (the "Transfer Period"). This provision shall survive the termination of this Agreement and any subsequent sale(s) of the Generating Facility. As used in this Section, (i) "Environmental Attributes" means any and all fuel, emissions, air quality, or other environmental characteristics, including green energy tags, renewable energy credits, or certificates attributable to the metered output generated by the Generating Facility during the Transfer Period; and (ii) "Environmental Attributes Reporting Rights" means all rights to report ownership of the Environmental Attributes to any person or entity under Section 1605(b) of the Energy Policy Act of 1992, any successor or replacement statutes, or otherwise.
16. For leased Generating Facilities. In exchange for the EarthWise™ Solar Energy Incentive SRP has reserved for and will pay to Customer, Customer shall sell, transfer and deliver to SRP (using the form of Bill of Sale as Exhibit A) all Environmental Attributes and Environmental Attribute Reporting Rights associated with the generation of energy by the Generating Facility for a period of _____ years, equivalent to the base term of the lease agreement (the "Lease Transfer Period"). As used in this Section, (i) "Environmental Attributes" means any and all fuel, emissions, air quality, or other environmental characteristics, including green energy tags, renewable energy credits, or certificates attributable to the metered output generated by the Generating Facility during the Lease Transfer Period; and (ii) "Environmental Attributes Reporting Rights" means all rights to report ownership of the Environmental Attributes to any person or entity under Section 1605(b) of the Energy Policy Act of 1992, any successor or replacement statutes, or otherwise.
17. The Incentive will be reserved after a completed application is received and approved by SRP. Customer has six (6) months to install the Generating Facility from date the Incentive is reserved. After six (6) months, Customer's reservation of Incentive expires unless SRP, in its sole discretion, approves an extension. If Incentive budget is available, and Customer is still planning to install the Generating Facility, a new reservation will be made at the current Incentive rate.
18. For new home construction with planned installation beyond six (6) months, please estimate installation date. An Incentive will be reserved based on Incentive level at time of installation. Incentive will be reserved for up to three (3) months past estimated installation date unless SRP, in its sole discretion, approves an extension.
19. Customer must notify the SRP EarthWise™ Solar Energy Program in writing if it elects to cancel the reservation application.

OTHER TERMS AND CONDITIONS

20. Customer agrees to let SRP monitor output of Customer's Generating Facility to verify energy generation.

Customer Name _____

- 21. Customer agrees that SRP may use data from Customer's Generating Facility in research activities and may publish and disseminate the data.
- 22. SRP may reject any application that does not meet the terms or conditions of the EarthWise™ Solar Energy Program, SRP's Electrical Service Specifications or Interconnection Guidelines for Distributed Generators.
- 23. This Agreement shall be interpreted, governed by, and construed in accordance with the substantive and procedural laws of the State of Arizona, without regard to conflicts of law principles. SRP and Customer agree that any action, suit, or proceeding arising out of or relating to this Agreement shall be initiated and prosecuted in state or federal court of competent jurisdiction located in Maricopa County, Arizona, and the Parties irrevocably submit to the jurisdiction and venue of such court. To the fullest extent permitted by law, each Party hereby irrevocably waives any and all rights to a trial by jury and covenants and agrees that it will not request a trial by jury with respect to any legal proceeding arising out of or relating to this Agreement. No provisions of this Agreement may be waived except by an express written instrument executed by the Party to be charged with such waiver. No waiver by either Party of any one or more defaults by the other in the performance of any provisions of this Agreement shall operate or be construed as a waiver of any future default or defaults, whether of a like or of a different character.

This Agreement is dated and effective as of the latest signature date below.

SECTION VIII: CONSENT TO ASSIGN INCENTIVE PAYMENT TO A THIRD PARTY

SRP allows the Customer to assign its Incentive payment to a third party. If the Customer elects to assign its Incentive to a third party, such as the installer, vendor, or manufacturer, please complete and sign the information below. In doing this, SRP will pay the Incentive directly to the designated third party. If Customer intends to retain the Incentive, please check the appropriate box and sign the form.

I wish to retain the Incentive (Customer must sign below).

I want to assign the Incentive to a third party (Customer & Third Party must complete consent form and sign below).

CONSENT TO ASSIGN INCENTIVE PAYMENT TO A THIRD PARTY:

I, _____ (“Customer”) authorize SRP to pay the Incentive to _____ (“Third Party”), at the following address: _____, on Customer’s behalf, as payment toward the cost and/or installation of Customer’s qualifying Generating Facility. Customer acknowledges and agrees that payment of the Incentive to Third Party shall satisfy SRP’s payment obligation to Customer in connection with SRP’s EarthWise™ Solar Energy Program. Customer and Third Party further acknowledge that the Customer owns all of the Environmental Attributes associated with the Generating Facility and the assignment of the Incentive does not alter the Customer’s ownership. Furthermore, Customer acknowledges that assignment of the Incentive does not relieve Customer of its obligation to sell to SRP all of the Environmental Attributes and Environmental Attributes Reporting Rights associated with the Generating Facility.
