

**CERTIFICATE IN LIEU OF ELECTRICAL
CLEARANCE FOR SOLAR PROJECTS**

Customer/Project Name: _____

SRP Account Number: _____

Service Address: _____

City/Zip: _____

IMPORTANT NOTICE

It is a customer's responsibility to ensure that all electrical facilities on the customer's side of the point of delivery for electric service are built and maintained in a safe operating condition. This responsibility includes ensuring that the customer's electrical facilities comply with all relevant construction codes and safety standards. Customers should coordinate this responsibility with their architectural and engineering consultants, construction contractors, or subcontractors, as appropriate before requesting SRP to energize their electrical systems (or, in the case of an electrical generating system, to allow interconnection with SRP's electrical distribution system). This Certificate In Lieu of Electrical Clearance ("Certificate") must be signed when the governmental authority having jurisdiction has elected to not require a permit or inspection for installation or significant modification to an electrical system on a customer's property. **A CUSTOMER'S FAILURE TO COMPLY WITH RELEVANT CONSTRUCTION CODES AND SAFETY STANDARDS MAY RESULT IN INJURY OR DEATH TO PERSONS OR DAMAGE TO PROPERTY.**

Customer's Certification of Readiness

The undersigned customer ("Customer") hereby certifies to SRP and agrees that:

1. Customer has read the foregoing "Important Notice" and fully understands Customer's obligations.
2. Customer is having a solar generating facility and related equipment ("Generating Facility") installed at the service address above.
3. Customer understands the governmental authority having jurisdiction, _____, at the present time does not require a permit or inspection for the installation of solar electric generating systems (including the Generating Facility). SRP will not review or inspect Customer's Generating Facility to verify compliance with the National Electric Code or other relevant construction codes and safety standards. It is Customer's responsibility to ensure all relevant construction codes and safety standards are met.
4. Customer represents to SRP that it has conferred with the party responsible for the design and construction of Customer's Generating Facility and verified that the Generating Facility has been designed, constructed, and installed (and will operate) in compliance with all relevant construction and safety codes and standards (including, but not limited to, NFPA 70 and Section 690 of the National Electric Code).
5. Customer understands that SRP has only inspected the Generating Facility to ensure that it will not harm or interfere with SRP's electrical distribution system. SRP has not inspected or approved any other electrical facilities or conditions at Customer's service address.

6. Customer must have the party responsible for the design and construction of the Customer's Generating Facility sign and have notarized the Certificate of Qualified Electrical Contractor below.
7. Customer assumes full responsibility for any and all damage to property (including, but not limited to, property owned or leased by Customer, SRP or any third party) and death or injury to persons (including, but not limited to, Customer's employees, agents and contractors; SRP's employees, agents and contractors; or any third parties) as a result of the installation and operation of the Generating Facility at the service address noted above.
8. Customer hereby knowingly and fully releases SRP from any and all claims and liability for any and all damages or injuries that result from conditions on Customer's side of the point of delivery at the service address noted above.
9. In reliance on the representations and agreements in this Certificate, SRP will, subject to SRP's Rules and Regulations, allow interconnection with SRP's electrical distribution system after Customer executes this Certificate, even though the governmental authority having jurisdiction has not reviewed or inspected Customer's Generating Facility to ensure compliance with the National Electric Code and other relevant codes and safety standards required by the governmental authority having jurisdiction.
10. SRP's delivery of power and Customer's interconnection with SRP's electrical distribution system are governed by SRP's Rules and Regulations for providing electric service. If this Certificate conflicts with the Rules and Regulations, the provisions of the Rules and Regulations will prevail.
11. (For commercial customers) The individual signing below is legally authorized to sign this Certificate on behalf of Customer.
