

Commercial TOU Price Plan Hours

SAVE MONEY ON TOU!

About 85% of summer and winter hours are off-peak and shoulder hours.

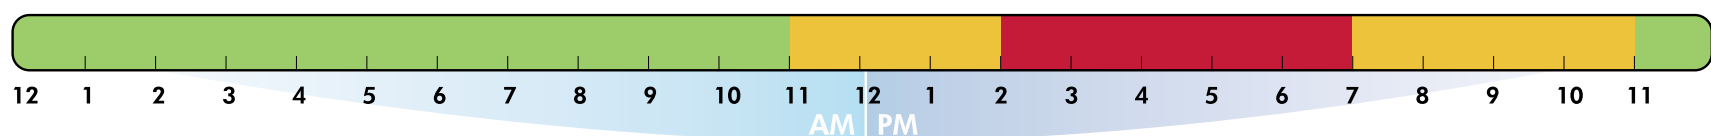

Did you know that you can help your company save money by running equipment during off-peak hours? The chart lists the TOU hours for summer and winter. The green areas on the chart are off-peak hours.

 OFF-PEAK LOWER PRICE  SHOULDER MEDIUM PRICE  ON-PEAK HIGHER PRICE

SUMMER

Monday–Friday

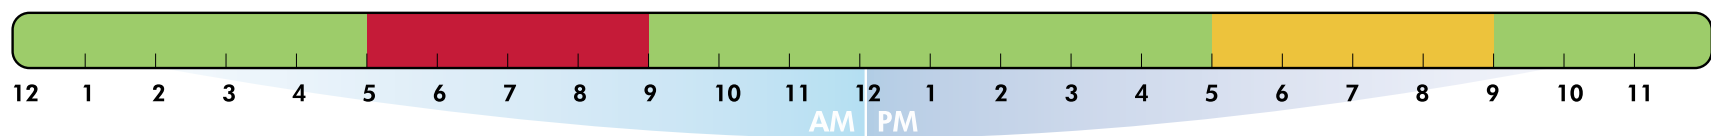

May, June, September, October

WINTER

Monday–Friday

November through April

HOW IT WORKS

The key to saving money on the SRP Time-of-Use™ (TOU) Price Plan for business customers is to shift usage from the higher-priced on-peak hours to the lower-priced off-peak and shoulder hours. You may already be doing some of this, and with additional adjustments, you could maximize your energy savings. Plus, off-peak pricing is about one-third the cost of on-peak pricing, making it a significant savings.
