

Allison Gullick

CANDIDATE NAME

Council

POSITION

District / Division 6

VOTING AREA

CANDIDATE INFORMATION

Allison Gullick is a proud Phoenician, community leader, and community epidemiologist who believes public institutions should serve people first.

She holds a Master of Science in Public Health in Applied Epidemiology from the University of Alabama at Birmingham and a Bachelor of Arts in Biology, Society, and the Environment from the University of Minnesota. Her work focuses on how large systems affect people's health and daily lives. In Arizona, decisions about energy and water are not abstract. They shape heat safety, air quality, chronic disease, and whether families can remain healthy and secure in their homes.

Transparency is one of Allison's core values. She believes people deserve clear information about how decisions are made, how resources are used, and how today's choices affect future costs. Open communication builds trust and leads to better outcomes. Affordability matters because families need bills they can count on. Allison believes energy and water should stay reliable and fairly priced. Good planning today helps avoid sudden cost increases later.

Allison strongly supports clean energy. Arizona's sunshine makes solar a practical and responsible choice that reduces pollution and protects public health. She has worked closely with community partners on heat response efforts and understands how energy reliability and cooling access affect safety during extreme heat.

She also serves as president of a historic Phoenix neighborhood association and helped neighbors plant more than 600 trees to reduce heat and improve air quality.

Allison lives in Phoenix with her husband, two children, and two beloved Old English Sheepdogs and brings a collaborative, data driven approach to leadership.
