20
21 **A PUBLIC HEARING WILL BE HELD** before the Arizona Power Plant and
22 Transmission Line Siting Committee (Committee) regarding the application of Salt River
23 Project Agricultural Improvement and Power District (SRP or Applicant) for a Certificate
24 of Environmental Compatibility (CEC) authorizing the above-captioned case (the Project).
25 The Project contemplates the construction of a new expanded substation located entirely
26 on a single customer-owned 187 acre parcel (Property). While the ultimate configuration
27 will await the determination of specific customer needs, and will be constructed over time,
the Project will contain a switchyard and associated structures, and at total build out the
site could contain multiple distinct transformer locations and up to twenty-two high
voltage structures supporting up to ten circuits. The switchyard will interconnect to the
existing Browning-Santan 230kV transmission line, which is located immediately north of
the Property.

All Project components are located in the City of Mesa, Arizona within Maricopa
County. A general location map of the Project is attached as Exhibit A.
