

Buy-Through Program FAQs

1. Is there a website with program details?

- Yes. srp.net/buythrough

2. How much space is available in the Buy-Through Program and what are the eligibility requirements?

- The Buy-Through Program's total participation is limited to 200 MW, with a per-account maximum of 50 MW.
- Participation is available to individual customer accounts on Standard Electric Price Plans E63, E65 or E67 that have, at the time of enrollment, a minimum Annual Peak Demand of 5 MW and a minimum average monthly load factor of 60%.

3. If a customer currently participates in SEO, can it also participate in the Buy-Through Program?

- Yes, but the customer's participation level will be reduced based on the portion of the customer's load that is participating in SEO. See Appendix B of the Program Requirements document for more information.

4. Why is there a three-year notice requirement to return to general service?

- The three-year notice requirement is imposed because of the significant lead time required to procure or build resources that may be necessary to serve the customer should they return to SRP's standard generation service.
